IdleFront Project Chronicle

Created 2026-09-09 as a living operations report for the OpenFront-to-IdleFront evolution project.
This document maps the project history, the preserved gameplay law, and major stability/performance milestones.
OpenFront gameplay rules are retained as the canonical interaction model while interface, hosting, and persistence are adapted for IdleFront.

Focus
Core mechanics remain intact.
Scale, pacing, reliability, and player-facing UX are the active frontier.

This version is intended as an auditable checkpoint for multi-week play and coordinated handoff.

OpenFront and IdleFront baseline

OpenFront remains the gameplay substrate.
Core systems retained: terrain conquest, bot behavior patterns, build ordering, combat math, diplomacy, transport pathing, and world initialization constraints.
IdleFront focuses on operational layers around this substrate rather than reinventions of rule math:
â¢ long-run test workflows
â¢ performance-aware iteration
â¢ user-account continuity
â¢ lobby and spawn lifecycle adjustments
â¢ UI/UX redesign for cross-platform use.

Sentiment analysis of prompting language

Language signals across this project record a direct, high-velocity collaboration pattern: concrete requests, explicit acceptance criteria, and rapid retests.
Constructive intent is high where actionable bug fixes are proposed clearly.
Criticality spikes in phases with blocked playtest loops (spawn stalls, black screens, catch-up stalls, and server errors).
Once root causes are isolated and reproducible, feedback shifts to iterative optimization and architecture-level change.

Commit timeline (latest first)

The list below tracks active development work in this branch. It is intentionally broad for audit and continuity.

2026-09-07 36073495 Align main menu ticker with header controls
2026-09-07 a5485fed Release restrained cartographic UI v0.11
2026-09-07 fb49669d Fix release CI portability
2026-09-07 0009285a Checkpoint working authoritative simulation recovery
2026-09-06 6dec8d24 Checkpoint optimized worlds and Satisfum UI before pixel-art transition
2026-09-05 0db75998 Verify XL long-session socket playtest and record activation
2026-09-05 277df804 Prepare larger-world playtest and full-map catchup overview
2026-09-05 49eb6357 Fix online playtest joins, enable server simulation broadly, and update Expo 57
2026-09-05 3819dc22 Run persistent-world simulation on server workers for multiplayer playtests
2026-09-05 2688fb47 Fix guest persistent-world playtest joins
2026-09-03 03ddd109 Serve generated map manifests reliably in development
2026-09-03 ecf22fa3 Merge remote-tracking branch ’origin/main’ into experimental/seamless-world
2026-09-03 200e382a Keep debug controls below mobile safe areas
2026-09-03 2d6fc5e9 Add debug telemetry and quick game launch
2026-09-03 e4a40934 Optimize Expanded Earth rendering hot paths
2026-09-03 8a5feff2 Document seamless Expanded Earth validation
2026-09-03 5810d7ef Integrate paged maps with repository generation checks
2026-09-03 f94f8959 Make Expanded Earth generation reproducible
2026-09-03 f4c29fce Support diplomacy across the full owner ID range
2026-09-03 88a9e2a0 Bridge paged maps into the current client renderer
2026-09-03 5f11104a Make traversal and water paths page safe
2026-09-03 e35f3183 Generate paged Expanded Earth world
2026-09-03 ff851436 Load arbitrary paged map manifests
2026-09-03 858f01c5 Add scalable paged game map foundation
2026-09-02 a9167d47 Drain live games before production deploys
2026-09-02 776d418e Archive stale persistent world lobbies
2026-09-02 67d78f4e Move developer menu trigger into map HUD
2026-09-02 602ae2c9 Lock mobile viewport and add hidden developer menu
2026-09-02 41efda7d Add durable elimination status and catch-up fast-forward
2026-09-02 9e563c66 Polish IdleFront shell and enforce standalone compliance
2026-09-02 1c708a7c fix: reclaim mobile map space around HUD
2026-09-02 bd9cbbc3 feat: replace attack slider with tactile dial
2026-09-02 def61491 fix: simplify mobile gameplay header states
2026-09-02 921fd8e7 fix: fit gameplay HUD around mobile safe areas

2026-09-02 e90cd2f9 fix: drain persistent games before restart
2026-09-02 744f1e91 feat: connect persistent worlds to managed gameplay
2026-09-02 c9b8a2d8 feat: establish IdleFront persistent world preview
2026-09-01 44524a8a Remove native command deck overlay
2026-09-01 2561470a Hide install prompt in native shell
2026-09-01 a8419b58 Simplify launch UI and add native glass control
2026-09-01 b0ed3e48 Target App Store Expo Go SDK
2026-08-27 643fe00c Add Expo mobile game shell
2026-08-27 f625d8e5 Comply with OpenFront licensing terms
2026-08-27 fe856ada Overhaul Pressure Atlas interface
2026-08-14 65fedb53 Finalize stable Cloudflare preview tunnel
2026-08-14 010f8828 Secure and supervise off-LAN idle preview
2026-08-14 df39d65c Build authoritative idle territory demo
2026-08-14 13e0b92b Document idle multiplayer foundation
2026-08-14 19ca3a16 Feat: Allow F and escape to cancel warship selection (#4993)
